Protect plants from slugs and snails without the need for pesticides. Vitax Slug Trap is a simple, effective and discreet way to lure away and catch slugs. The traps are easy to empty and reuse so you can continue to use them time and time again.

Place the trap base in the ground so the top is level with the surrounding soil.

Fill the base 3/4 full with water, or for better results use beer.

Add 2 teaspoons of salt.

Attach the lid.
Revisit the trap regularly to check if it needs to be emptied and reset.
